

Warm Season Grass Acreage Survey

The Association of Warm Season Grass Producers (AWSGP) is a grower group for farmers, businesses, and others focused on expanding markets for herbaceous biomass crops, including perennial grasses like switchgrass and miscanthus. It is led and managed by farmers and producers, with some facilitation by Penn State Extension. Visit www.awsgp.org for more information.

The purpose of this AWSGP survey is to learn where warm season grasses are currently being grown in the region. Your voluntary participation is appreciated.

1. Personal Contact Information

Name: _____
 Address: _____
 Phone: _____
 Email: _____

Can we add you to the AWSGP mailing list, where you'll find peer-to-peer farmer education, event announcements, and other information?

Yes

No

2. Farm/Business Information

Farm Location (physical address or approximate coordinates):

3. Do you produce any non-food biomass crops (switchgrass, miscanthus, mulch hay, etc.)?

Crop:		Approx. Acreage:	
Crop:		Approx. Acreage:	
Crop:		Approx. Acreage:	

4. Do you have land in CRP/CREP/EQIP/other incentive programs involving perennial grasses?

Program:		Approx. Acreage:	
Program:		Approx. Acreage:	

When you have completed this survey, please give it to an educator at the Penn State Energy Extension booth.

Thank you!
